

Implementing Comply-to-Connect will establish a framework of tools and technologies operating throughout the network infrastructure that discover, identify, characterize and report on all devices connecting to the network.

• Step 00 – Preparation

Get ready, C2C is coming. Start modernizing hardware and software for network switching components and endpoint security tools.

C2C KEY FUNCTIONS

- 1) Identify and control access for all endpoints connecting to the infrastructure
- 2) Orchestrate/integrate cybersecurity tools
- 3) Automate cybersecurity processes into a synchronized and automated ecosystem

TIMELINE

SIPR	NIPR
September 2020 Begin Deployment	March 2021 Begin Deployment
December 2020 Complete Step 1	December 2021 Complete Step 1
March 2022 Complete Steps 2 & 3	March 2023 Complete Steps 2 & 3
December 2022 Complete Step 4	September 2023 Complete Step 4
June 2023 C2C SIPR FOC	March 2024 Complete C2C System
